Content :	<p>Chapter I General Provisions</p> <p>Article 1</p> <p>These Regulations are enacted pursuant to Paragraph 2 of Article 26 of the Customs Act (hereinafter referred to as "the Act").</p> <p>Article 2</p> <p>The term "warehouse" as referred to in these Regulations is herein defined as a storage facility duly approved and registered with the Customs to hold goods for import, export, or trans-shipment and transit that are pending or under processing for Customs release.</p> <p>Article 3</p> <p>The operation of the warehouses, upon the official designation of the Customs authorities or upon Customs authorization of the operator's application, may be subject to autonomous management. The Customs shall not dispatch any customs officer to be stationed at a warehouse placed under the autonomous management system. However, the Customs may dispatch an officer to guide operations during the initial stages of the autonomous management period.</p> <p>The conditions, matters, and review procedures of the aforementioned autonomous management system are subject to the provisions of the governing laws and regulations.</p>

Warehouses operated under the autonomous management system shall appoint dedicated personnel to implement the aforementioned Customs authorized autonomous management matters pursuant to the governing Customs regulations. The Customs may conduct regular or unscheduled audit procedures, the procedures and regulations of which are subject to the discretion of the Customs authorities.

In the matter of a warehouse that is authorized by the Customs for autonomous management that is located in air cargo terminals outside the airport control zones, such warehouse may, upon due Customs authorization employ its own distinctive sealing tape to seal private bonded containers registered pursuant to the provisions of "The Regulations Governing the Customs Administration of Bonded Cargo Transportation Means" for the transportation of air cargo into and out of the Airport Control Zone, under the supervision of the Customs in charge of that zone. The requirements of the application for the use of its own distinctive sealing tape shall be as specified in the related Customs announcements.

Article 4

Except for certain special circumstances, a warehouse established under the provisions of these Regulations shall be classified under one of the following two categories:

1. Warehouse for imports: The facility is limited to the storage of import goods or trans-shipment goods and transit goods pending or under processing for Customs release.
2. Warehouse for exports: The facility is limited to the storage of export goods pending or under processing for Customs release.

A warehouse located inside an air cargo terminal is likewise subject to the provisions of these Regulations.

Chapter II Establishment

Article 5

In the matter of the establishment of a warehouse, the facilities shall be of a sturdy construction and shall be equipped with the necessary anti-theft, fire safety, and flood safety equipment, be well-ventilated, have proper lighting, and have other equipment ensuring the safety of the stored goods, as well as equipment that provides for the convenience of Customs management and inspection procedures. The ground scales (weight scale) and oil gauge used in the freight station shall comply with the standard requirements. The ground scales (yearly) and oil gauge (once every two years) shall undergo and pass the inspection of an inspector of the Bureau of Standards, Metrology and Inspection, MOEA.

Open space approved as goods storage facilities under the provisions of Article 17 shall be properly segregated or isolated from its surrounding areas; however, this provision shall not be applicable to a warehouse located within the control zones of international harbors or international airports.

The warehouse operator shall install a computer and the necessary online link equipment to facilitate the processing of operations and electronic transmission of data to Customs authorities. This requirement shall not be

applicable to a warehouse having small business volumes. The regulations of the operation shall be as specified in the related Customs announcements. In the matter of an existing warehouse, the Customs may announce a deadline for the installation of the said computer and necessary online link equipments for the operations of the warehouse.

Article 6

Unless otherwise authorized by the Customs, warehouses shall be located within the control zones of international harbors and international airports.

The warehouses authorized to hold the sea or sea/air and air/sea transit cargoes shall be located within the control zones only.

The warehouses authorized to hold the air transit cargoes may be located within international airport control zones or outside control zones.

Article 7

Warehouses for imports shall contain a special storage section for the storage of damaged or valuable goods. Moreover, the cargo for which customs declaration is overdue or has not been withdrawn by the due date shall be stored in exclusive segregated sections.

The warehouses authorized to hold transit goods shall contain a separate exclusive section for transit goods only, as well as appoint a dedicated person to monitor and manage the said section.

Article 8

The operator applying for the establishment of a warehouse is obliged to submit the following documents to the local customs office for field inspection, and registration shall be approved after qualification on inspection. However, where the warehouse is located within an air cargo terminal, the operator shall first apply to the Ministry of Transportation and Communications for approval of any construction before an application for warehouse registration may be filed with the Customs.

1. Application form: The form shall contain the name of the establishment, company, and business enterprise, as well as the business registration number, address, telephone number, and the full name, citizen's ID. number, telephone number, and address of the person-in-charge;
2. The details of the location, building structures, and the interior facilities and floor plan of the warehouse facility;
3. The original copy and photocopy of the user's permit for the warehouse building;
4. Where the warehouse shall require the use of open spaces, the floor plan and the user's permit or authorization documents of the warehouse open space areas, and the respective photocopies of the documents shall be submitted.

In the matter of the documentary requirements prescribed in Items 3 and 4 of the foregoing paragraph, where the applicant is a government agency or a state-run enterprise, only the floor plan shall be required.

Article 9

Hazardous goods shall be stored in dedicated sections of the warehouse. A

warehouse may hold hazardous goods only after it has acquired approved documents issued by the respective competent authorities for the location and safety equipment of the warehouse.

Article 10

At the time when a warehouse has been approved by Customs for establishment, the operator is obliged to submit a guarantee bond amounting to NT\$150,000 to the Customs within ten days from the second day of the date of the approval of its registration, and to complete the procedures of the registration.

Where the operator of the warehouse is a government agency or state enterprise, the aforesaid requirement of a guarantee bond shall be waived.

Article 11

Upon completion of the warehouse registration procedure, the Customs shall issue a warehouse registration certificate; and the operator shall regularly apply for Customs review and correction once in every two years. The warehouse operator is obliged to apply immediately for the issuance of a certificate in the case of the loss of its warehouse registration certificate.

Article 12

A duly-registered warehouse manifesting any of the following circumstances shall be obliged to process an application for a change of registration with the competent authorities, and within thirty days from the second day of the date of approval of its change of registration, shall to the Customs authorities to process the correction of registration and for the issuance of a replacement registration certificate:

1. Correction of name;
2. Correction of business address;
3. Correction of person-in-change;
4. Increase or reduction of lines of business;
5. Capital increment or reduction.

A duly-registered warehouse shall be required to declare any change in the location or area of the warehouse to the Customs authorities for due approval.

A duly-registered warehouse shall apply for the cancellation of its warehouse registration certificate due to the termination of its operations on valid grounds, and the operator shall be obliged to clear all the stored goods of its warehouse and remit payment of all related regulatory fees, charges, duties or taxes, and penalty fines.

Chapter III Management

Article 13

The unloading period of import goods for storage into the warehouse and the period for the withdrawal of Customs-released export goods out of the warehouse are limited to the period from 6:00 a.m. to 6:00 p.m. daily, except on holidays. The storage of export goods into the warehouse and withdrawal of Customs-released import goods from the warehouse shall be

limited to the Customs office hours. However, the foregoing time limits are not applicable to a warehouse placed under the autonomous management system by the Customs, or to the procedure of examination and release alongside the aircraft, in express cargo handling zones, or other special circumstances approved by the Customs.

Article 14

All goods stored inside the warehouse shall be positioned with labels facing up and piled up by batch in the respective sections where they should belong. Identifying signs shall be posted on the walls of each respective area for clear identification. This requirement is not applicable to an automated warehouse approved by the Customs to carry out computer control and management or a special warehouse approved for the storage of bulk cargo, such as an oil tank or silo.

Article 15

In the matter of the unloading and storage of the cargo imported or trans-shipped and transited by sea into the warehouse, the operator shall compile the import manifest information transmitted by the cargo forwarders or after received the paper import manifest and then complete a goods acceptance declaration form and a general guarantee. The contents of the form shall include the name of the vessel, and quantities of goods, and thereafter shall be forwarded to the cargo forwarders who shall present the form to the Customs to apply for the issuance of general discharge permit or special permit pursuant to "The Regulations Governing the Management of Import/Export Clearance for Transportation Means", and the said goods may be unloaded and stored into the warehouse. In the matter of the unloading and storage of the cargo imported or trans-shipped and transited by air into the warehouse, the cargo forwarder shall present the flight import manifest to the Customs and apply for the permit; and, at the same time the forwarder shall forward the said import manifest to the warehouse. However, where goods are to be unloaded and stored into a warehouse located outside the airport control zone, the cargo forwarder shall submit an application form jointly executed by the forwarder and the warehouse operator to apply for the air cargo special permit.

In the matter of the unloading and storage of the cargo imported or trans-shipped by air into the warehouse located inside the air cargo terminal, the warehouse operator shall discharge the goods from the containers or pallets within three days from the second day of storage. However, this requirement is not applicable to the import goods of military affairs' agencies and the goods are unable to be discharged from the containers or pallets, with the prior approval of the Customs.

A warehouse authorized to hold transit goods located outside the control zone of an international airport is required to execute the unpacking, shipment batch breakdown, and airline label tagging operations of the transit goods within the exclusive transit goods section.

A warehouse authorized to hold transit goods located inside the control zone of an international harbor or international airport is required to execute the unpacking, shipment batch breakdown, and airline label tagging or repacking of the transit goods within the exclusive transit goods

section.

The "repacking" referred to in the foregoing is limited to bulk packing, separate packing, or repacking operations that merely separate or combine products and require simple manpower labor or packing tools to accomplish. In the matter of the transit goods approved by the Customs for trans-shipment that require container loading or pallet packing, but not including sea cargo transit goods which are to be exported by ocean carriers, the Customs may approve the direct shipment of goods into a warehouse licensed to hold general export goods, and container loading and pallet packing operations may be executed under the supervision of a Customs officer.

Article 16

Cargo unloaded from the same voyage or flight of an importing vessel or aircraft shall be piled up according to the respective bills of lading or airway bills of the cargo, and shall not be mixed up with the cargo unloaded from different voyages or flights of the same vessel or aircraft and from the different vessels or aircrafts. Transit goods shall be piled up separately from general import goods to avoid confusion.

Where the warehouse placed under the autonomous management system by the Customs and the cargo storage position is controlled by a computer system, the Customs may conduct an online audit at anytime it shall deem necessary, and the limitations of the preceding paragraph shall not apply.

Article 17

Goods contained in overweight or oversized packages or cases, or manifesting other special circumstances may be stored in the open space area of the warehouse following due Customs approval. However, import and export goods shall be stored in separate sections, and the warehouse operator shall be responsible for the safety and management of the said goods.

The open space area referred in the preceding paragraph shall be adjacent to the registered warehouse. However, where sites are located within the control zones of international harbors, international airports, and free trade zones, or where the adjacent or neighboring land is expropriated by the government, this requirement shall be waived.

Article 18

In the matter of the import, trans-shipment, or transit goods stored into a warehouse, the warehouse operator shall check that the name of aircraft or vessel, flight or voyage number, and the label of the goods, case number, or airline tag number and quantities of goods are consistent with the data manifested in the Customs release notice, bill of lading or airway bill, trans-shipment permit, or other documents approved by the Customs, and complete the surveillance, escort, affixation of electronic seal or inspection with instrument as notified by the customs before releasing the goods out of the warehouse. However, where the Customs has not implemented an automated customs clearance system, the warehouse operator shall verify the Customs seals on the bill of lading or airway bill, or trans-shipment permit, and that such form have been duly signed by the stationed Customs

officer, the goods may be released accordingly.

The warehouse operator is required to retrieve the receipts and documents showing approval of the withdrawal of goods from the warehouse referred in the preceding paragraph at the time that the withdrawal procedure is completed. Moreover, the operator shall stamp the words "Withdrawal of all goods in this bill of lading or airway bill has been effected, bill of lading or airway bill invalidated" on the bill of lading or airway bill. Bills shall be stapled together according to the manifest sequence and properly filed for safekeeping. If the goods were partially released, the following label shall be stamped on the bill, "Withdrawal of partial goods in this bill of lading or airway bill has been effected". The bill shall be retrieved after the withdrawal of all of the goods is accomplished, and at which time the label "Withdrawal of all goods has been effected, bill of lading or airway bill invalidated" shall be stamped on the bill, and thereafter stapled together for filing. After the trans-shipment permit is stamped with "Shipment batch has been duly trans-shipped", those permits shall be stapled together for filing, or, after the Customs approving document is stamped with "Shipment batch has been released from warehouse", such documents shall be stapled together for filing.

The bill of lading or airway bill, trans-shipment permit, and other documents approved by the Customs referred to in the preceding paragraph may be destroyed after two years following the actual release date of goods whereupon such case is designated as closed.

Article 19

Whenever export goods are being stored into the warehouse, the operator shall issue an "Export Goods Warehoused Voucher "and forward the message to the Customs immediately.

In the matter of export goods stored into the warehouse, the operator shall verify that the name and voyage number of the carrier vessel or the flight number of the aircraft, and the label, case number, or airline label number and the quantity of the goods consistent with the Customs release notice and shipping order (or booking note), and complete the surveillance, escort, affixation of electronic seal or inspection with instrument as notified by the customs before releasing the goods from the warehouse for shipment. Where the Customs has not implemented an automated customs clearance system, the operator shall verify the Customs seals on the shipping order or the cargo booking application form, and that such form have been duly signed by the stationed Customs officer, the goods may be released accordingly.

In the event that, for certain reasons, the export of certain goods stored in the warehouse is cancelled from the shipment, the warehouse operator shall isolate the cargo and clearly label the batches. The cargo owner who withdrew the said goods from the warehouse shall submit an application form and apply for Customs approval. The operator shall verify that the name and voyage number of the carrier vessel or the flight number of the aircraft, and the case numbers or airline label numbers and the quantity of the goods are consistent with the said application form, and that such form have been duly signed by the stationed Customs officer, the goods may be released accordingly.

Article 20

Where it is necessary to transfer the stored import goods from one warehouse to another, the cargo owner and the cargo forwarder shall apply for permission to transfer the goods; a letter of explanation for the transfer prepared by the warehouse operator and a checklist of the transfer goods, together with the incoming delivery agreement and the general guarantee of the accepting warehouse duly signed by the operator of such warehouse shall be attached to the application. The transfer of the goods may be effected after due Customs approval.

Article 21

Whenever there is a need to conduct a survey, sample taking, sample viewing or to implement the necessary maintenance in regard to the import, export or trans-shipment and transit goods stored in the warehouse, the cargo owner shall apply for the Customs special permit and that such permit have been duly signed by the stationed Customs officer, the said goods are allowed to be unpacked and shall be restored by the cargo owner under the surveillance of the warehouse operator.

In the matter of the reworking or correction of the label, case number, or air flight label number in regard to the import, export or trans-shipment and transit goods stored in the warehouse, and the repacking, reloading or re-tying of the exported goods, such actions shall require the approval of Customs and on the signing of the permit by the stationed Customs officer, the relevant procedures may be executed under the surveillance of the warehouse operator thereafter.

Article 22

In the event of a shortfall or surplus in the quantity of import goods unloaded into the warehouse, the operator shall prepare a report within the following prescribed deadlines. Processing of the cancellation or amendment shall be completed within three days from the day following the delivery of the original "Short/Over-Landed Report" to the Customs.

1. Sea cargo containers (goods):

(1) Containerized goods: Within three days from the day following the goods been discharged from the container.

(2) Non-containerized goods: Within seven days from the day following the full delivery of the entire cargo batch into the warehouse.

2. Air cargo containers (goods):

(1) Regular goods: Within three days from the day following the full delivery of goods into warehouse.

(2) Express goods: Within the day following the full delivery of goods into warehouse.

(3) Goods inspected and released alongside aircraft: Upon full delivery of the goods into the warehouse.

In the event of the breakage of goods stored in the warehouse, the operator shall immediately prepare a checklist of the damaged, broken, deteriorated or lost goods. The list shall be forwarded to the goods manager of the cargo forwarder transporting the concerned goods for attesting signature, and then submitted to the Customs for verification.

Article 23

Warehouse operators are required to attend to the following matters according regulations. Where circumstances require, the Customs may institute inspection procedures.

1. Verification of the import, export, or trans-shipment and transit of goods entering or being withdrawn from the warehouse, the issuance of the "Export Goods Warehoused Voucher ", and the transmission of the "Import Goods Taken Delivery Summary".
2. Verification of the repacking or re-tying of the authorized export goods.
3. Verification of the reworking or correction of the label or case number of the authorized import or export goods.
4. Verification of the authorized sample viewing, sample taking, and survey procedures.
5. Verification of other matters implemented pursuant to operating requirements according to the Customs directives.

Article 24

Warehouse operators are required to prepare inventory logs or electronic general incoming acceptance log files according to the Customs-authorized format. The logs shall make manifest the location of the goods within the warehouse, as well as the dates of incoming storage, outgoing withdrawal, conduct of the sample taking, or other Customs-regulated matters of the goods. Information shall be separately recorded in detail and kept up-to-date, and verified pursuant to the Customs release documents; moreover, operators shall prepare a daily report or computer printout report of the warehoused goods to the Customs for reference. Where circumstances require, the Customs may dispatch an officer to implement proper audit and verification.

Article 25

Warehouse operators are obliged to dutifully execute their custodial duties in regard to the stored goods and the custody goods seized by the Customs or the goods marked for seizure in their warehouse.

Where the goods stored in the warehouse are subject to disposal under the provisions of the "Customs Anti-Smuggling Act" or other related regulations, the Customs may, on the strength of the custody receipt or the withdrawal receipt held by the Customs, move such goods from the warehouse to the Customs warehouse at anytime the Customs may deem necessary. The operators of the warehouse concerned are obliged to comply.

Article 26

The term "duly signed by the stationed Customs officer" referred to in Article 19 and Article 21 shall no longer be required after the warehouse is placed under the autonomous management system.

The term "container or pallet which are overdue for discharging" referred to in Paragraph 2 of Article 15 shall be subject to Customs surveillance. Where the warehouse concerned implements an autonomous management system, no special surveillance fee shall be collected where no Customs officer is

assigned to monitor procedures.

Article 27

The Customs shall be entitled to deduct any or all unpaid duty payments, fees and charges, or penalty fines of the warehouse operator from the guarantee bond of the operator.

The warehouse operator is obliged to remit payment for any shortfall in the guarantee bond amount due to the deduction implemented as stated in the foregoing paragraph within one month from the second day after receiving the official Customs notice.

Chapter IV Fines and Penalties

Article 28

Where the operator of a warehouse violates the matters for compliance prescribed in Paragraph 4 of Article 5, Article 7, Article 12, Article 14, Article 17, Paragraph 2 of Article 18 or Article 24, the Customs may, pursuant to the provisions of Article 86 of the Act, issue a warning to the operator and demand the operator to make rectifications within a specified period of time or impose a fine ranging from NT\$6,000 to NT\$15,000, and such imposition may be repeated if necessary. Where the operator do not rectify its behavior after the repeated imposition of a fine for three consecutive times, a suspension of goods storage privileges may be adopted for a period of not more than six months.

Article 29

Where the operator of a warehouse violates the provisions prescribed in Article 11, Paragraph 1 of Article 15 or Article 16, the Customs may, pursuant to the provisions of Article 86 of the Act, issue a warning to the operator and demand the operator to make rectifications within a specified period of time or impose a fine ranging from NT\$6,000 to NT\$30,000, and such imposition may be repeated if necessary. Where the operator does not rectify its behavior after the repeated imposition of a fine for three consecutive times, a suspension of goods storage privileges may be adopted for a period of not more than six months.

Article 30

Where the operator of a warehouse violates the provisions prescribed in Article 13, Paragraph 1 of Article 21, Article 22 or Article 23, the Customs may, pursuant to the provisions of Article 86 of the Act, issue a warning to the operator and demand the operator to make rectifications within a specified period of time or impose a fine ranging from NT\$6,000 to NT\$15,000.

Article 31

Where the operator of a warehouse violates the provisions prescribed in Paragraphs 3 or 4 of Article 15, Paragraph 1 of Article 18, Article 19 or Article 20, the Customs may, pursuant to the provisions of Article 86 of the Act, issue a warning to the operator and demand the operator to make rectifications within a specified period of time or impose a fine ranging

from NT\$6,000 to NT\$20,000.

Article 32

Where the operator of a warehouse violates the provisions prescribed in Paragraph 2 of Article 21 or Article 25, the Customs may, pursuant to the provisions of Article 86 of the Act, issue a warning to the operator and demand the operator to make rectifications within a specified period of time or impose a fine ranging from NT\$6,000 to NT\$30,000.

Article 33

Where the operator of a warehouse violates the provisions prescribed in Paragraph 2 of Article 27, the Customs may, pursuant to the provisions of Paragraph 2 of Article 93 of the Act, suspend the business operation privileges of the aforementioned operator for a period of not more than six months, or repeal the registration of the business.

Article 34

Where the stored goods contained in a warehouse have been withdrawn out of the warehouse, lost, stolen, or where the quantity is reduced due to other reasons in violation of the provisions of Article 13、Article 18、Article 20、Article 21 and Article 25, pursuant to the provisions of Article 7 of the Act, the operator of the concerned warehouse shall be obliged to pay the import duties of the shortage. Such cases as are involved in smuggling, duty evasion or other violations of law shall be dealt with in accordance with the provisions of the Customs Anti-Smuggling Act and other relevant laws.

Chapter V Addendum

Article 35

A warehouse established under the provisions of these Regulations shall be jointly locked by the warehouse operator and the Customs. This requirement is not applicable to a warehouse authorized by the Customs to operate under autonomous management.

The warehouse operator may choose the joint lock for the warehouse, as referred to in the foregoing paragraph, and submit the lock to the Customs for recognition. A duplicate set of keys shall be stored in a suitable place within the warehouse premises for immediate use in the event of fire or other emergency occurring at the site of the warehouse, at which time it may be necessary to open the lock of the warehouse before the arrival of the Customs representative. The warehouse operator is obliged to notify the Customs immediately upon the opening of the warehouse lock, as well as submit an official report to the Customs for filing.

Article 36

The warehouse operator is required to provide an office room with office desk, telephone line(s), computer(s), and other office equipment for the necessary work of the stationed Customs officer or the Customs auditor, and is also required to provide the transportation for the stationed Customs officer. Moreover, the warehouse operator is obliged to pay the pertinent

Customs regulatory fees and charges. Where it shall be necessary for Customs officers to be stationed in the warehouse permanently, the warehouse operators shall be responsible for their accommodations.

Article 37

Whenever the entirety of the import, export, trans-shipment or transit goods have been withdrawn out of the warehouse under Customs approval, the Customs may, upon the request of the warehouse operator, authorize a suspension of the business operations of the warehouse. No regulatory fees shall be collected from the warehouse operator during the suspension of the period of operations.

Article 38

Whenever the warehouse is approved by the Customs for temporary suspension of business operations, and then the application of the warehouse operator for the resumption of business operations has been approved by the Customs, its original registration certificate may still be used during the period of the proofreading until the expiration of the proofreading period.

Article 39

These Regulations shall be effective from the date of their proclamation.

※In the case of discrepancies between the English and Chinese versions of these regulations, the latter shall prevail.
